

Rotary vane compressor Type RPO 800

8	8 280-00 Ä	Maßblatt - Dimension sheet
Index	Änderungsnr. Modification no.	250 179-00 M
mw	12.05.2016	
Name	Datum Date	

Compressor Type RPO	Suction volume flow [ltr / min]	Motor-rated power @ 10barg [kW]	Weight of Compressor [kg]	Weight e-motor [kg] 10)	Total weight [kg] 7),11)
800	770	7,5	67	44	111

Technical Data:

- Suction pressure 1 bar
- Cooling air temperature min -40 °C / max +40 °C
other temperatures are to clarify with CVS
- Cooling air volume flow rate max 1100 m³/h
- Operating mode: Load - unload operation
Load - idle - unload operation
⑧ Load - idle - temperature run - unload operation

Driving motor:

- Voltage 3 x 400V, 50Hz
- Design form: B35
- Degree of protection: IP55 vibration proofed
- Rotational speed: 1500 1/min

- Pipework to the oil cooler in case of blow direction "right".
- Pressure air outlet optionally "laterally" or "behind".
In case of pressure air outlet "right" only "laterally" possible.
- Fastening trapped hole M12 x 26 deep.
Needed min. thread length 24mm!
- Free space for oil filter exchange
(Oil separator, air filter, oil filter).
- Width for blow out channel.
To keep the stagnation pressure as low as possible,
should the exhaust channel should be expanded.
- Rotating direction on the compressor service side /
seen on the driving shaft "left".
- Weight information: compressor without oil filling.
- Adapter flange for e-motor
- Motor terminal box typically "on top",
"right" or "left" after consultation.
- From 01.01.2013 is used motor type 1LE1.
- Total weight with motor type 1LE1.
- Minimum distance to the wall!

Subject to change without prior notice!
